# Description

OPTIMA-R-FC is a variable air volume (VAV) controller with or without insulation. The product is intended to control the air pressure in a ventilation system. The product is installed into circular ducts. Field of application is e.g. offices, hotel rooms, meeting rooms or larger public or industrial halls where the required cooling and heating load will vary on demand.

## Highlights

- Damper tightness class 4 according to EN 1751
- Casing tightness class C according to EN 1751
- Conform with hygienic requirements according to VDI 6022
- High measurement/control accuracy in 5% deviation range
- Air volume range of 36 m<sup>3</sup>/h to 12344 m<sup>3</sup>/h
- Operating range of duct pressure up to 1000 Pa
- OPTIMA-RI-FC version with external insulation for radiated sound reduction

## Types of Product

- **OPTIMA-R-FC:** Circular VAV Controller
- **OPTIMA-RI-FC:** Circular VAV Controller with Acoustic Insulation

## List of Accessories

- **ZTH-EU** Configuration and setup tool for VAV controllers OPTIMA-...B...
- **Belimo Assistant** Configuration and setup NFC app. for Android smartphones for OPTIMA-...BP
- **ZIP BT NFC** Converter Bluetooth/NFC smartphones to configure OPTIMA-...BP in Belimo Assistant app.

## Design

OPTIMA-R-FC consists of a casing, a damper blade and a measurement probe. The casing is manufactured from galvanized sheet steel. The casing contains a duct connection with a rubber gasket. The damper blade is manufactured from extruded aluminium. The blade is equipped with a rubber gasket. The gasket eliminates leakage in the closed position. The aluminium measurement probe is connected to the VAV controller with flexible polyurethane impulse tubing. The special design of the multi-point averaging cross-flow sensor assures accurate air flow readings. OPTIMA-RI-FC has 19 mm thick polymer foam insulation around the casing. The insulation is covered by a galvanized steel protection sheet.

Controller Type	Flow Volume Adjustment Analog Input	Flow Volume Adjustment via BUS Com.	Controller Parameters Setup	Hard Wired Override	Feedback signal type	Feedback Values (Analog Output) ^1)^	BUS Communicated Variables	Power Supply
BP	DC 0 V (2 V) ... 10 V	MP-BUS	ZTH-EU, PC tool, NFC (Android), MP-BUS	Open ^2), Close, V <sub>min</sub> , V <sub>max</sub>	DC 0 V (2 V) ... 10 V, MP-BUS	Actual volume, Damper Angle, Actual pressure	<b>Read/Write:</b> Setpoint, V <sub>min</sub> , V <sub>max</sub> , Open, Close <b>Read:</b> Actual volume, Damper angle, Actual pressure, Serial number, Fault/Alarm messages	AC 24 V, DC 24 V
BM					MODBUS, MP-BUS, DC 2 V ... 10 V			
BK		KNX	ZTH-EU, PC tool, KNX	Open ^2), Close ^2), V <sub>max</sub> ^2)	KNX			
BA	DC 0 V (2 V) ... 10 V		ZTH-EU, PC tool	Open ^2), Close, V <sub>min</sub> , V <sub>max</sub>	DC 0 V (2 V) ... 10 V	Same variables as BM		
GM		MODBUS	Dials on controller, MODBUS		MODBUS, DC 0 V (2 V) ... 10 V			

#### NOTES:

1. Only one analog output available. One value type for feedback can be chosen.
2. Only available with AC 24 V power supply

## Controls

The VAV controllers are as standard equipped by compact controllers/actuators with analog setpoint and feedback signals in mode DC 2 V ... 10 V or DC 0 V ... 10 V. The compact controllers are equally available with MP-BUS, MODBUS, BACnet and KNX communication capability. On demand as an alternative, Gateway communication units can be provided and can be connected later to building management systems (only possible with MP-BUS communication on board). VAV compact controllers are factory calibrated as standard to the default air volume. Upon request, the VAV controllers can be adjusted to site-required settings prior to dispatch on V<sub>min</sub> and V<sub>max</sub> range. The air volumes can also be readjusted on site with the ZTH-EU handheld service tool or, for the type OPTIMA...GM... by dials on the controller. If specific air volumes for V<sub>min</sub> and V<sub>max</sub> are required, this must be indicated before the order of the units for adequate calibration in the factory.

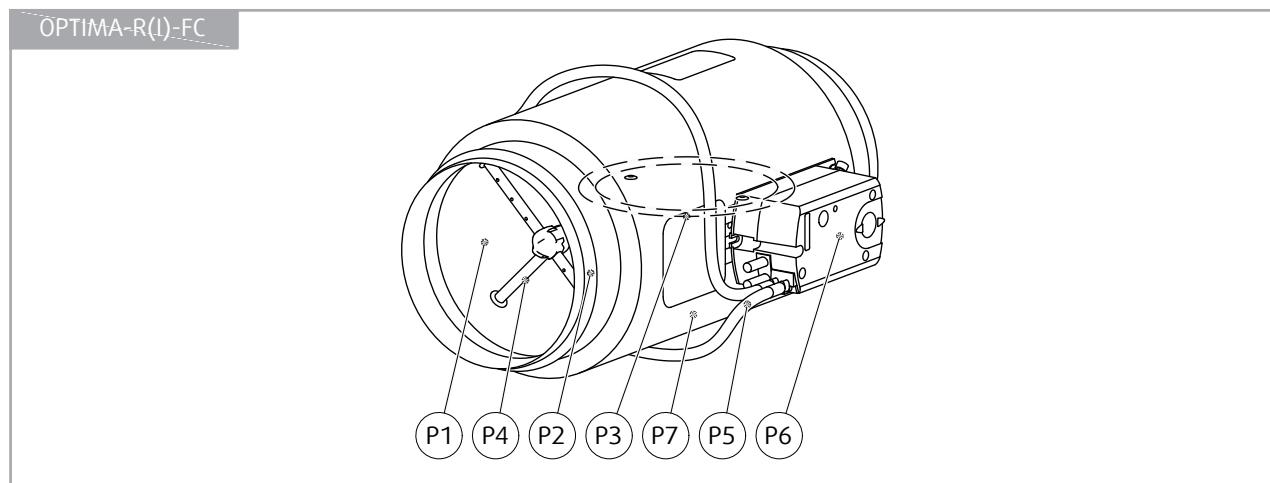

- BP: Belimo LMV-D3 compact controller with MP-BUS communication and analog 0 (2) V ... 10 V setpoint and feedback signals. NFC communication port is available for the device configuration by the "Belimo Assistant" smartphone application.
- BA: Belimo LMV-D3 compact controller without BUS communication and with analog 0 (2) V ... 10 V setpoint and feedback signals.
- BM: Belimo LMV-D3 compact controller with selectable Modbus RTU and BACnet MS/TP bus communication, MP-BUS communication and analog 0 (2) V ... 10 V setpoint and feedback signals.
- BK: Belimo LMV-D3 compact controller with KNX bus communication. The controller uses S-Mode (System mode) as the KNX communication mode.
- GM: Compact controller with parametrizing dials and display for immediate adjustment on site, communicative via Modbus-RTU and with analog 0 (2) V ... 10 V setpoint and feedback signals.

## Tightness of the Blade and the Casing

4C in all sizes

The classification is done according to the standard EN 1751 for static pressure up to 1000 Pa.

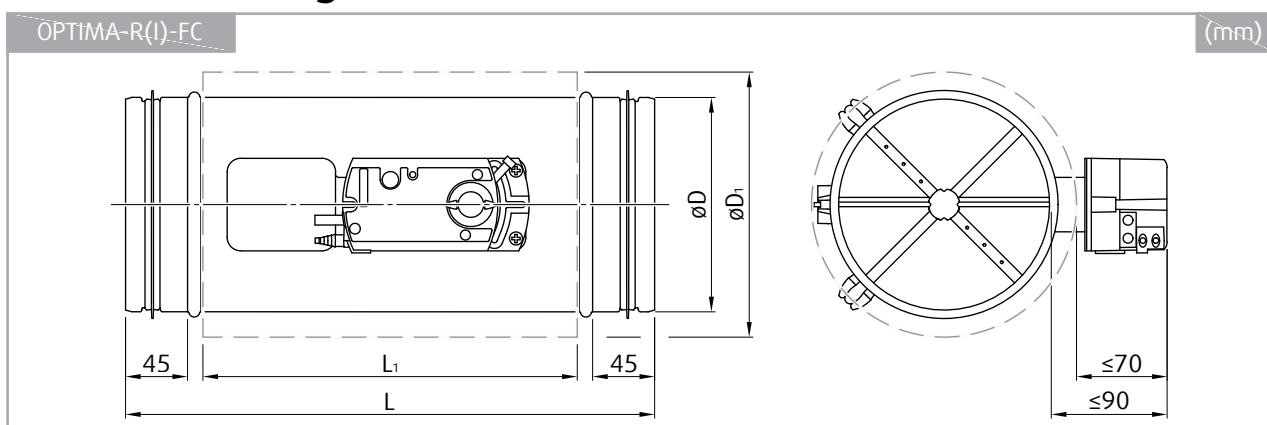

## Product Parts

### Legend

- P1** Casing
- P2** Duct connection with gasket
- P3** Damper blade
- P4** Air flow measurement probe
- P5** Air flow measurement impulse tubing
- P6** Compact air flow volume controller/damper actuator
- P7** Insulation with outer sheet metal mantle (OPTIMA-RI-FC)

## Example of Ordering Code

OPTIMA-R-FC-200-BM-0

Circular VAV controller, 200mm in diameter, with Modbus-RTU and BACnet MS/TP communication on board.  
 $V_{min} = 266 \text{ m}^3/\text{h}$   $V_{max} = 1018 \text{ m}^3/\text{h}$  (default factory adjustment corresponding to min. 2 m/s and max. 9 m/s velocities).  
Signal mode DC 0 V ... 10 V.

NOTES: If not stated in the ordering code, the signal mode default mode DC 2 V ... 10 V will be adjusted from the factory. The type BK uses the S-Mode (System mode) as the KNX communication mode.

# Accessories

## ZTH-EU

### Handheld Tool

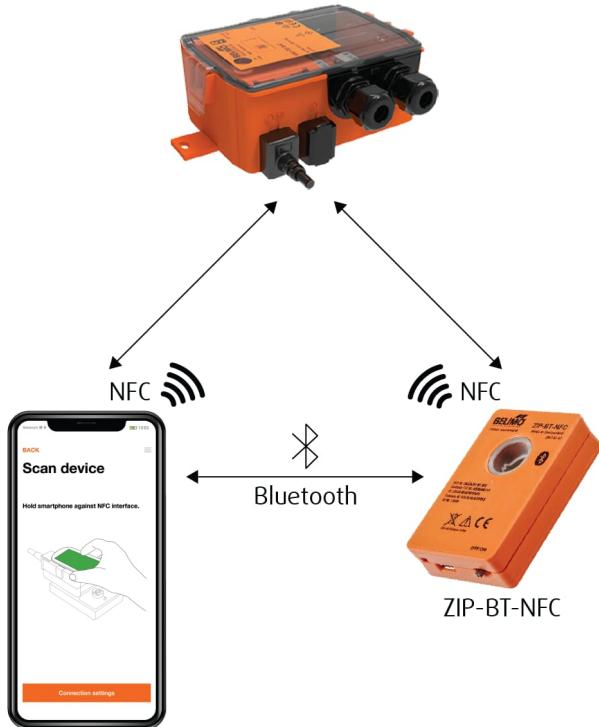

ZTH-EU is a handheld tool for VAV controllers and communicative actuators. The product enables the customer to change the configuration of the VAV controllers.

## ZIP-BT-NFC

### Communication Port Bluetooth/NFC

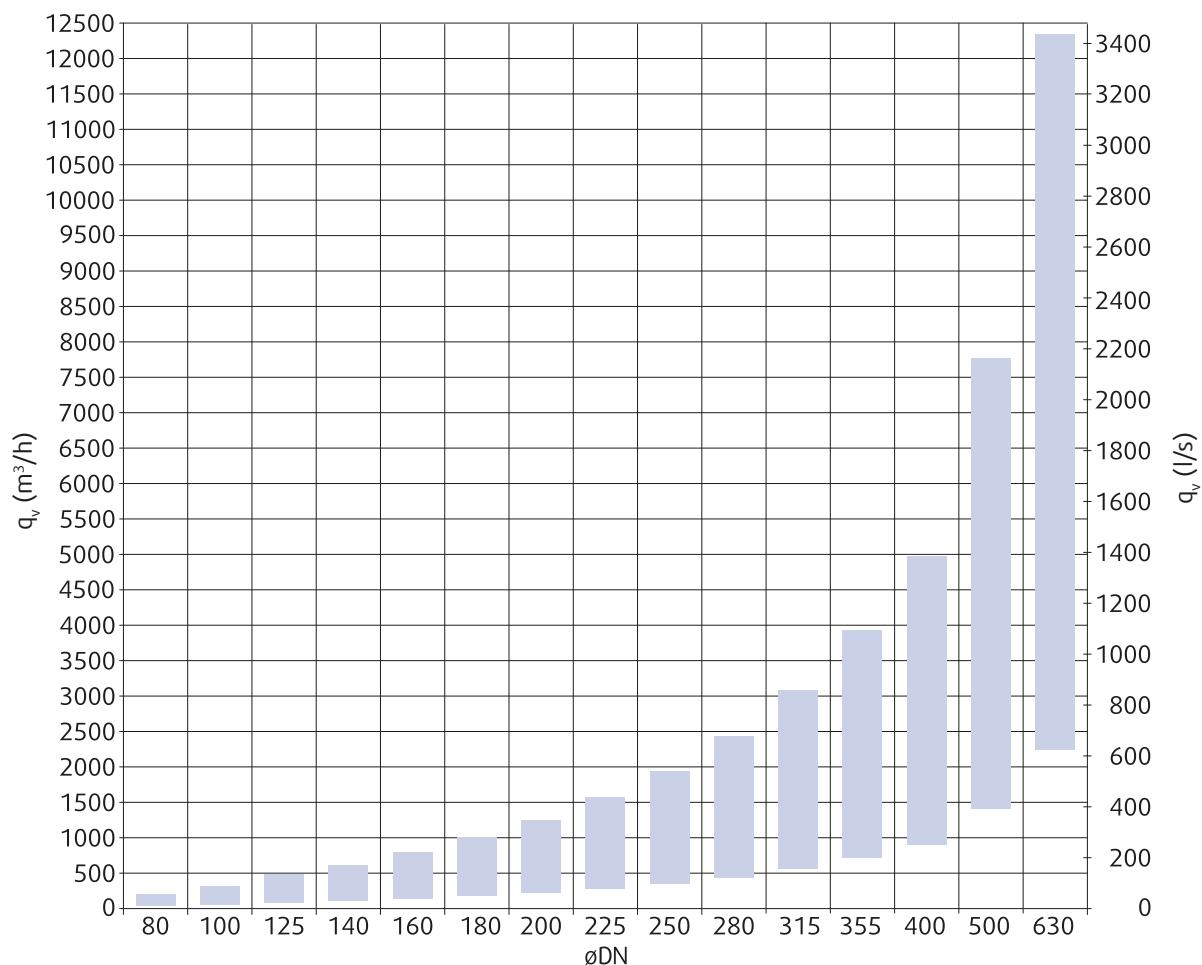

ZIP-BT-NFC is a wireless interface connecting the smartphone with configuration app Belimo Assistant via Bluetooth to the VAV controller VRU... with NFC communication protocol.

## Quick Selection

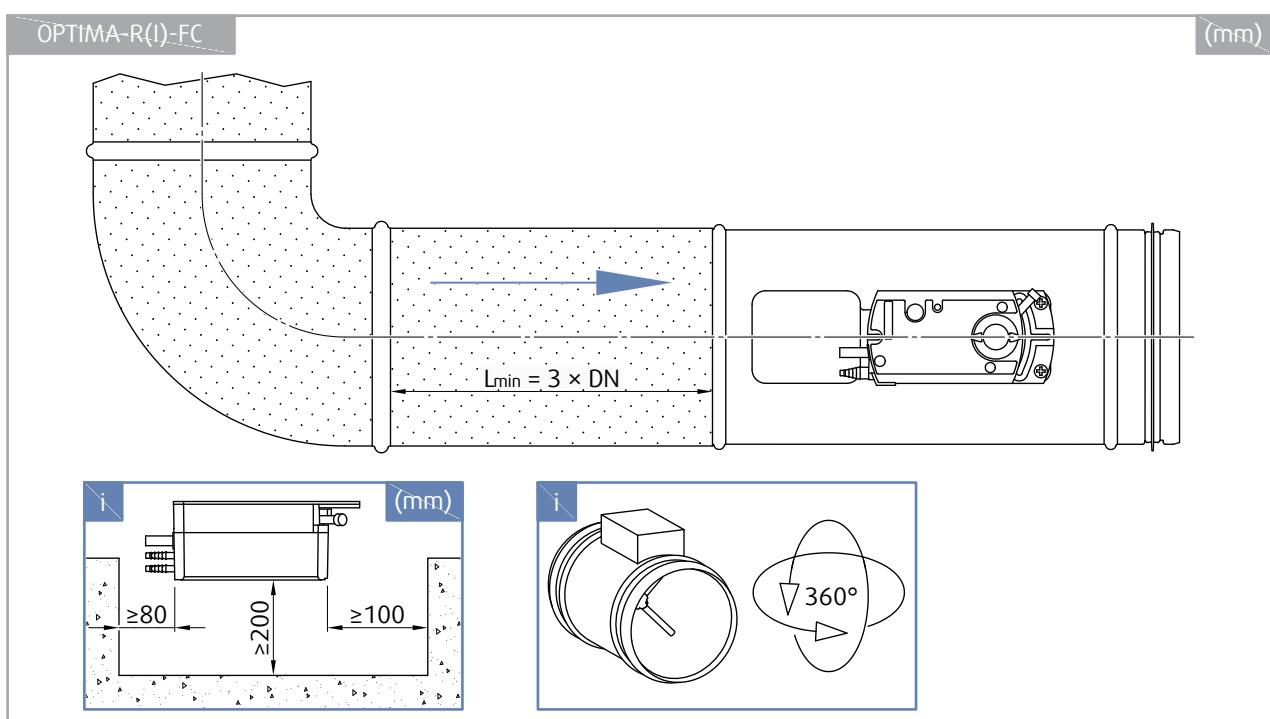

NOTE: The  $V_{\min}$  can be adjusted between 0% and 100% of  $V_{\text{nom}}$ . The  $V_{\max}$  can be adjusted between 20% and 100% of  $V_{\text{nom}}$
