For medium to smaller air flow volumes against high resistances.

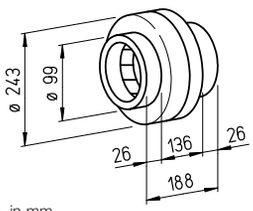
Specifically made for in-duct installation. High pressure characteristic to overcome resistances of bends, filters etc. Universal in application for domestic, commercial and industrial purposes.

RR

Efficiency class

E RR 100 C

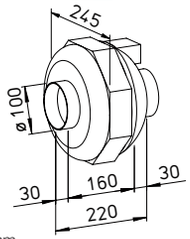
F RR 100 A



Dim. in mm

RRK

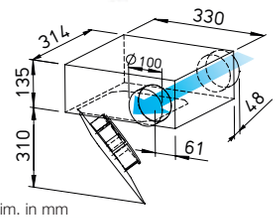
Alternative in corrosion and impact resistant polymer casing.



Dim. in mm

SVR

SlimVent – Exceptionally flat space saving miracle with swing out motor and impeller unit.



Dim. in mm

Special features

- Less space required and simple site installation of the compact in line design.
- Its simplicity reduces site costs.
- Supply and exhaust air spigots fit all standard circular duct sizes.
- Power adjustment by 100% variable speed control.
- Installation in any position.
- Wide range of accessories.
- Aerodynamically optimized casing design.

Common features

Motor

Closed, ball bearing-mounted external rotor motor with humidity protection, insulation class F, for continuous operation, maintenance free and interference-free.

Motor protection

Automatically switches off and on again after cooling due to built-in thermal contacts with the winding wired in series.

Installation

Can be mounted in any position – horizontal, vertical or diagonal – suitable for supply and extract ventilation by correct installation. To minimise the effective noise level it is recommended that the fan is installed as remote as possible from the ventilated space.

Sound levels

See page 333.

Specification RR

Casing

Robust casing from galvanised sheet steel for harsh operating conditions. Intake and exhaust Spigots on intake and exhaust fit standard ducts.

Speed control

Type RR 100 A from 0 – 100 % possible by means of electronic controller or step transformer (see table). For Type RR 100 C additional two-speed operation using Type DS 2/2 (accessories).

Type DS 2/2 Ref. no. 1267

Electrical connection

Terminal box (IP 54) located on outer casing.

Impeller

Centrifugal impeller with backward curved polymer blades. Directly mounted to motor and dynamically balanced as a unit. Low-noise, highly efficient.

Protection class

When installed in intake and exhaust ducting and rainwater penetration is prevented, the fan is rated IP 44.

Specification RRK

Casing

All components made from corrosion and impact resistant polymer. Six built-in guide vanes also increase the level of efficiency. Colour: Silver-grey.

Speed control

From 0 – 100% by means of electronic controller or step transformer (see table).

Electrical connection

Terminal box (IP 54) located on outer casing.

Impeller

Centrifugal impeller with backward curved polymer blades. Directly mounted to motor and dynamically balanced as a unit. Low-noise, highly efficient.

Protection class

IP 44

Specification SVR

Casing

Flat and robust casing from galvanised sheet steel. Spigots on intake and extract with twin-seal rubber gaskets fit into standard ducts. Particularly service-friendly (cleaning) through swing out motor and impeller unit without disassembly of system components. Space for the swing out facility must be considered.

Speed control

From 0 – 100% by means of electronic controller or step transformer (see table) or two-speed operation with Type DS 2/2 (accessories).

Type DS 2/2 Ref. no. 1267

Electrical connection

Terminal box (IP 54) fitted to running cable.

Impeller

Energy-saving centrifugal impeller with forward curved blades. Dynamically balanced for low noise operation.

Protection class

When installed in ducting IP 44.

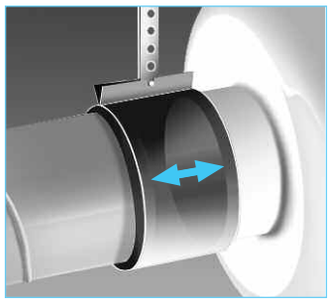
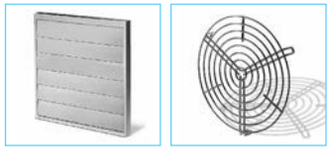
Accessories

Pipe clamp connectors
Type BM 100 Ref. no. 5075
A quick-fix method for connecting fans to ducting, reducing vibration transmission (1 kit = 2 pieces). When installing leave a little gap between fan and ducting.



Mounting feet for RR
Type MK 4 Ref. no. 5824
Mounting feet for RRK
Type MK 1 Ref. no. 5821
Made from galvanised steel sheet.

Gravity shutter
Type VK 100 Ref. no. 0757
Automatic made from white polymer.



Rain repellent grille
Type G 100 Ref. no. 0796
Made from white polymer.

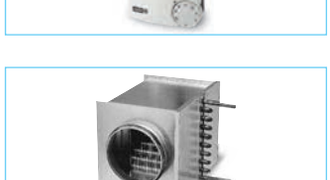
Guard
Type SGR 100 Ref. no. 5063
For intake and exhaust installation on fan, made from powder-coated steel wire.

Backdraught shutter
Type RSKK 100 Ref. no. 5106
Automatic, made from polymer.

Flexible attenuator
Type FSD 100 Ref. no. 0676
Spigotted aluminium attenuator with 50 mm insulation. Length 1 m.

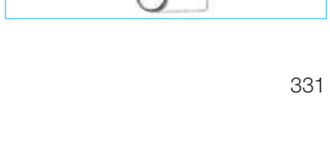
Air filter box
LFBR 100 G4 Ref. no. 8576
LFBR 100 F7 Ref. no. 8530
Air filter with large surface area to be installed in-line with ducting.

Electric heater batteries
EHR-R 0,4/100 0,4 kW No. 8708
In galvanised steel sheet casing.



Temperature control system for electric heater batteries EHR-R
Type EHS Ref. no. 5002

Warm water heater battery
Type WHR 100 Ref. no. 9479
Compact heat exchanger for in-line installation.



Temperature control system for warm water heater battery
Type WHST 300 T38 No. 8817

For medium to smaller air flow volumes against high resistances.

Specifically made for in-duct installation. High pressure characteristic to overcome resistances of bends, filters etc. Universal in application for domestic, commercial and industrial purposes.

Special features

- ☐ Less space required and simple site installation of the compact in line design.
- ☐ Its simplicity reduces site costs.
- ☐ Supply and exhaust air spigots fit all standard circular duct sizes.
- ☐ Power adjustment by 100% variable speed control.
- ☐ Installation in any position.
- ☐ Wide range of accessories.
- ☐ Aerodynamically optimized casing design.

Common features

☐ Motor
Closed, ball bearing-mounted external rotor motor with humidity protection, insulation class F, for continuous operation, maintenance free and interference-free.

☐ Motor protection
Automatically switches off and on again after cooling due to built-in thermal contacts with the winding wired in series.

☐ Installation
Can be mounted in any position – horizontal, vertical or diagonal – suitable for supply and extract ventilation by correct installation. To minimise the effective noise level it is recommended that the fan is installed as remote as possible from the ventilated space.

Terminal box (IP 54) located on outer casing.

☐ Impeller
Centrifugal impeller with backward curved polymer blades. Directly mounted to motor and dynamically balanced as a unit. Low-noise, highly efficient.

☐ Protection class
When installed in intake and exhaust ducting and rainwater penetration is prevented, the fan is rated IP 44.

Specification RRK

☐ Casing
All components made from corrosion and impact resistant polymer. Six built-in guide vanes also increase the level of efficiency. Colour: Silver-grey.

☐ Speed control
From 0 – 100% by means of electronic controller or step transformer (see table).

☐ Electrical connection
Terminal box (IP 54) located on outer casing.

☐ Impeller
Centrifugal impeller with backward curved polymer blades. Directly mounted to motor and dynamically balanced as a unit. Low-noise, highly efficient.

☐ Protection class
IP 44

Specification SVR

☐ Casing
Flat and robust casing from galvanised sheet steel. Spigots on intake and extract with twin-seal rubber gaskets fit into standard ducts. Particularly service-friendly (cleaning) through swing out motor and impeller unit without disassembly of system components. Space for the swing out facility must be considered.

☐ Speed control
From 0 – 100% by means of electronic controller or step transformer (see table).

☐ Electrical connection
Terminal box (IP 54) fitted to running cable.

☐ Impeller
Energy-saving centrifugal impeller with forward curved blades. Dynamically balanced for low noise operation.

☐ Protection class
When installed in ducting IP 44.

Accessories

Pipe clamp connectors
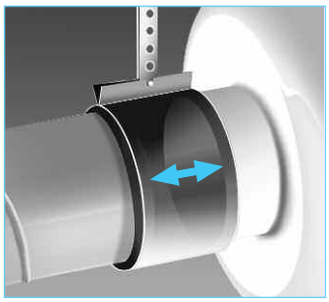
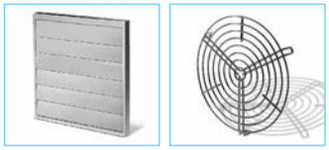
Type BM 200 Ref. no. 5078
A quick-fix method for connecting fans to ducting, reducing vibration transmission (1 kit = 2 pieces). When installing leave a little gap between fan and ducting.



Mounting feet for RR
Type MK 4 Ref. no. 5824
Mounting feet for RRK
Type MK 2 Ref. no. 5822
Made from galvanised steel sheet.

Gravity shutter
Type VK 200 Ref. no. 0758
Made from polymer, light grey.

Rain repellent grille
Type RAG 200 Ref. no. 0750
Made from polymer, light grey.



Guard
Type SGR 200 Ref. no. 5066
For intake and exhaust installation on fan, made from galvanised steel.

Backdraught shutter
Type RSK 200 Ref. no. 5074
Automatic, made from metal.

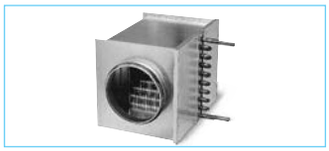
Flexible attenuator
Type FSD 200 Ref. no. 0679
Spigotted aluminium attenuator with 50 mm insulation. Length 1 m.

Air filter box
LFBR 200 G4 Ref. no. 8579
LFBR 200 F7 Ref. no. 8533
Air filter with large surface area to be installed in-line with ducting.

Electric heater batteries
EHR-R 1,2/200 1,2 kW No. 9436
EHR-R 2/200 2,0 kW No. 9437
EHR-R 5/200 5,0 kW No. 8711
– with integrated temp. control
EHR-R 5/200 TR 5,0 kW No. 5295
Room or duct sensor required (TFK/TFR, accessory).

Temperature control system for electric heater batteries EHR-R
Type EHS Ref. no. 5002

Warm water heater battery
Type WHR 200 Ref. no. 9482
Compact heat exchanger for in-line installation.



Temperature control system for warm water heater battery
Type WHST 300 T38 No. 8817

For medium to smaller air flow volumes against high resistances.

Specifically made for in-duct installation. High pressure characteristic to overcome resistances of bends, filters etc. Universal in application for domestic, commercial and industrial purposes.

■ Special features

- ☐ Less space required and simple site installation of the compact in line design.
- ☐ Its simplicity reduces site costs.
- ☐ Supply and exhaust air spigots fit all standard circular duct sizes.
- ☐ Power adjustment by 100% variable speed control.
- ☐ Installation in any position.
- ☐ Wide range of accessories.
- ☐ Aerodynamically optimized casing design.

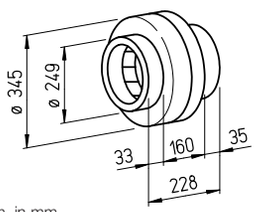
■ Common features

☐ **Motor**
Closed, ball bearing-mounted external rotor motor with humidity protection, insulation class F, for continuous operation, maintenance free and interference-free.

☐ **Motor protection**
Automatically switches off and on again after cooling due to built-in thermal contacts with the winding wired in series.

RR

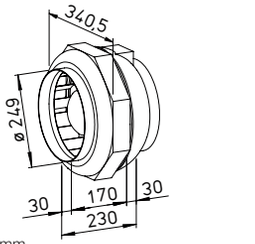
Market-leading series offering excellent value for money.
With energy saving mode as standard.



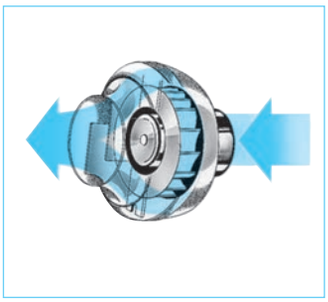
Dim. in mm

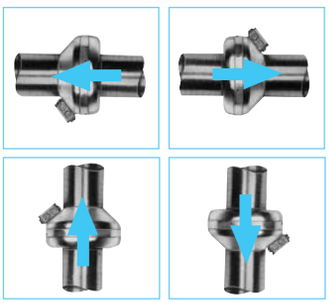
RRK

Alternative in corrosion and impact resistant polymer casing.



Dim. in mm





■ Specification RR

☐ **Casing**
Robust casing from galvanised sheet steel for harsh operating conditions. Intake and exhaust Spigots on intake and exhaust fit standard ducts.

☐ **Speed control**
From 0 – 100% by means of electronic controller or step transformer (see table).
Two-speed operation possible for Type RR 200 A using Type DS 2/2 (accessories).
Type DS 2/2 Ref. no. 1267

☐ **Electrical connection**
Terminal box (IP 54) located on outer casing.

☐ **Impeller**
Centrifugal impeller with backward curved polymer blades. Directly mounted to motor and dynamically balanced as a unit. Low-noise, highly efficient.

☐ **Protection class**
When installed in intake and exhaust ducting and rainwater penetration is prevented, the fan is rated IP 44.

■ Specification RRK

☐ **Casing**
All components made from corrosion and impact resistant polymer. Six built-in guide vanes also increase the level of efficiency. Colour: Silver-grey.

☐ **Speed control**
From 0 – 100% by means of electronic controller or step transformer (see table).

☐ **Electrical connection**
Terminal box (IP 54) located on outer casing.

☐ **Impeller**
Centrifugal impeller with backward curved polymer blades. Directly mounted to motor and dynamically balanced as a unit. Low-noise, highly efficient.

☐ **Protection class**
IP 44

☐ **Installation**
Can be mounted in any position – horizontal, vertical or diagonal – suitable for supply and extract ventilation by correct installation. To minimise the effective noise level it is recommended that the fan is installed as remote as possible from the ventilated space.
